Advancer

AD20

Advancer AD20 is a Smart OBD Dongle with an integrated diagnostic module and cloud services. Connected via Bluetooth and controlled by the smartphone. AD20 is a great tool for all vehicle owners. It Provides various functions like DTC scanning, Components tests, trip recording, driving skills monitoring, etc.

EASY DIAGNOSTICS

Perform diagnostic via standard OBDII protocols

OBDII LIVE DATA

Shows live data anytime when the engine is running

HUD DISPLAY

Turns your mobile phone into an add-on HUD display on the car

TRIP RECORDER

Record trip status, fuel consumptions, driving performances for every trip driven

COMPONENTS TEST

Quick check on vehicle's health status using check procedures

MODE \$06 MONITOR

Check fault counters before actual issues roll in

FUNCTION LIST

OBDII Read&Clear Fault Code	✓	Driving Monitor	✓
OBDII Live Data	✓	Smog Check	✓
Full System Read&Clear Fault Code		Throttle Carbon Build-up Test	✓
ECU Test (Read&Clear Code)	✓	Battery Test	✓
Service Light Reset		Acceleration Test	✓
Trip Recorder	✓	Smart Dashboard	✓
OBDII Mode \$06	✓		

SPECIFICATION

Processor	ARM Cortex-M4	Sleeping Current	100mA 12V
Interface	OBDII standard interface	Working Temperature	-20~60°C
Bluetooth	BLE 5.0	Power Counsumption	≤1W
Working Voltage	9V - 16V	Support Bus	CAN_BUS, K_LINE, L_LINE, SAE-J1580-VPW SAE-J1580-PWM
Working Current	100mA 12V
