TS100

TS100 is a general-purpose programmable tire pressure sensor developed by Xtool. It can replace the original sensor of vehicles equipped with TPMS. 99% of the models on the general market are suitable. It integrates 315MHz and 433MHz dual frequency. It can be activated, and programmed unlimitedly. It monitors tire pressure in real time.

UNIVERSAL TIRE PRESSURE SENSOR

One TS100 sensor model will cover the majority of automotive brands and models

EASY TO PROGRAM

Can be programmed by TP150 easily

LONG LIFESPAN

3-5 years lifespan for each sensor

DUAL FREQUENCY

Can replace 315/433MHz sensors

COST SAVING

Saves your time and money researching various OEM sensors

SPECIFICATION

Battery Life	≥5 years
Pressure monitoring range	±10kpa
Weight (except air tap)	13.8g
Shell material	PA66+GF30
Dimension	46.4x16.2x25mm
