# E2 PRO

## Smart Diagnostic System for EVs

**Comprehensive powertrain controller diagnosis and repairs**

**Read SOC (State of Charge), SOH (State of Health), and fault codes**

**Offers off-vehicle testing for DCDC converters, compressors, and motor controllers**

**Enables data flashing and repair for 12V/48V/BMS modules in Mercedes-Benz, BMW, and Tesla vehicles**

The XTOOL New Energy Diagnosis Device E2 Pro is an advanced and comprehensive diagnostic tool for new energy vehicles. It is designed to tackle the common pain points in EV car diagnostics, such as identifying and diagnosing problems. Covering full system diagnosis, full function resolution, and efficient one-stop-solution services. Moreover, the E2 Pro supports online upgrades, enabling more intelligent and efficient diagnosis. With continuous updates and new features, it keeps vehicle diagnosis at the forefront of technology.

# Special Function

| | | | | |
|---|---|---|---|---|
| A/C Relearn | A/F Reset | ABS Bleeding | ADAS calibration | Suspension |
| Airbag Repair | BMS Reset | Clutch Adaption | Coolant Bleeding | Crank Sensor Relearn |
| Transport Mode | DPF | ECU configurations | EGR Relearn | EPB |
| FRM Reset | Gearbox Match | Headlight | HV Battery | Injector Coding |
| Language change | Oil Reset | Power Balance | Rain/Light Sensor | Reset control unit |
| SAS Adjustment | Seat Calibration | Speed Limit | SRS | Start/Stop Reset |
| Throttle Matching | Tire Size Reset | TPMS Reset | Window Initialization | AdBlue Reset |
| EEPROM | Immobilizer | Instrument Cluster | NOx Reset | Odometer Read |
| VGT Relearn | VIN | ECU Reset | Gateway Simulation | Radar Calibration |

# Specification

| Operating System | Android 10.0 | Communication Method | Dual Wi-Fi & USB |
|---|---|---|---|
| Processor | 4 Core 1.80GHz | Connectivity | Type-C |
| Memory | 8+256GB | Working Voltage | DC9-36V |
| Display | 10.1" IPS Touchcsreen | Battery | 6480mAh, 7.2V |
| Camera | 8.0 Megapixel | WIFI | 2.4Hz/5.0Hz |
| Dimension (L×W×H) | 311×190×41mm | Compatible Protocol | CANFD\DoIP |
