

Anyscan A30X

Portable Wireless Scan Tool

26+ Advanced special functions

A pocket-sized VCI device

Compatible with the Anyscan+ mobile app for vehicle diagnostics

Supports FCA vehicles with secure gateway access

Anyscan A30X is a full-system wireless scan tool that's compact enough to fit in your pocket and works seamlessly with mobile phones. It supports both iOS and Android platforms, and covers over 80 popular vehicle brands and 5,000+ models. Additionally, it offers a wide range of special functions, including BMS reset, DPF regeneration, and EPB reset.

- Automatically recognizes vehicles and starts scanning
- Quickly reads and clears OBD DTC codes
- Records and replays live data in CSV format
- Provides detailed pre- and post-scan reports
- Supports bi-directional functions like actuator tests
