ACT600

ACT600 is a portable and movable intelligent ADAS calibration device designed for ADAS maintenance applications. It supports multiple ADAS systems including ACC, LDW, AVM, BSM, and NVS, with built-in OEM calibration parameters. Equipped with multiple line laser devices and full-angle adjustment functions, it delivers millimeter-level calibration accuracy.

FULL-ANGLE ADJUSTABLE DESIGN

Supports front/rear, left/right, angle, height, and horizontal fine adjustment for fast and precise alignment during ADAS calibration.

MILLIMETER-LEVEL CALIBRATION ACCURACY

Equipped with multiple line laser devices to directly determine alignment and calibration points, achieving millimeter-level calibration precision.

PORTABLE & MOVABLE STRUCTURE

Features a full quick-release folding and modular structure design for convenient assembly, storage, and transportation, supporting flexible calibration operations in different locations.

OEM PARAMETERS & WIDE ADAS SYSTEM COVERAGE

Built-in OEM calibration parameter database covering mainstream ADAS vehicle models, supporting ACC, LDW, AVM, BSM, NVS, and other major ADAS systems.
